Summary

Hello, I have been a Software Engineer since 2018. I mostly do Front-End web development, simple Back-End and AI projects. With over six years of experience in software engineering, specializing in frontend development, I am eager to bring my skills and passion for web technologies to your team.

Skills

Frontend: Typescript, Next.js, React.js, Angular.js, Vue.js, Tailwind, AntDesign

Backend: Few experience in .NET, Express.js, PHP/CI/Laravel & GraphQL

Testing: Jest, React Testing Library

Tools: Git, Postman, Jira, Trello, Firebase

Education

- **Ms.IT | President University | Now**

Student. Master thesis: Karate Movement Classification Using TCN on Pose Sequences.

- **Bs.IT | President University | 2014-2018**

Graduated. Bachelor thesis: Breast Cancer Diagnostic using K-NN Algorithm.

Work Experience

Front End Web Developer | Bank Mandiri (Jakarta) | 2023 – Present

- Smart Branch by Mandiri

The platform is made to automate and simplify bank branch operations. The main goals are to reduce errors and fraud and speed up processes. I helped building the apps using Angular.js.

- KOPRA by Mandiri

Indonesia's leading wholesale banking platform, trusted by major corporations to manage international trade and financial transactions. I worked with Angular.js and React.js to ensure these features ran smoothly and met the needs of enterprise users.

Frontend Developer | Hypestacks (UK & Singapore) | 2023

- YourPropFirm

A financial foreign-exchange dashboard used by prop-trading firms. The system displays real-time financial data for analysis and decision-making. I built the FE from scratch using Next.js and TypeScript. I also did a few contribution to BE using .NET, AWS Lambda, DynamoDB and created trading data visualizations with Power BI.

Frontend Web Developer | Aplikasi Super (Jakarta) | 2021 – 2023

- Superapp & Superagent

This platform distributes basic necessities in rural areas of Indonesia through a network of agents through a single application. Developed E-Commerce & Supply Chain Management System back-office which manages data, logistics, and customer service. Developed using React.js, Redux, Tailwind CSS, Jest.
