Viona Zatil Aqmar Kaleb

Software Engineer | MSIT | Building Scalable Fintech, E-commerce
& Interactive 3D Solutions | React Angular Vue Typescript Node
Jakarta, Indonesia

Summary

Hi, I'm Viona. I've been writing code for seven years. Mostly on the frontend with React, Next, Angular, Vue. I'm also comfortable across the backend stack with Express, GraphQL, PHP, and Firebase. I have a Master's in Computer Science focusing on Machine Learning. Because while shipping features is fun, I've always wanted to understand why things work. And that curiosity is what keeps me eager to learn. My work has taken me across some interesting problems. A few years ago I shipped 3D wayfinding solutions installed across major Singapore landmarks, including Singapore Discovery Centre, Supreme Courts and Woodsquare. Helping thousands of visitors find their way inside complex facilities in real-time. After that, I founded the frontend stack of a fast-moving UK fintech product from its earliest stages. Contributing to a real-time trading analytics platform, serving over 1.2 million trading accounts and more than 65 prop firm clients worldwide. Closer to home, I helped digitizing Indonesia's social commerce and hyperlocal supply chain platform, keeping test coverage above 90% on every feature. I also helped build Indonesia's first integrated e-sports community and tournament platform, connecting players directly with tournament organizers. These days I'm with the largest state-owned bank in Indonesia, where I help digitalizing bank branch operations nationally, accelerating and reducing fraud by 85%. Open to interesting conversations. If you're building something good, say hi. Website: <https://viona-kaleb.vercel.app>

Experience

PT Bank Mandiri (Persero) Tbk.
Frontend Engineer
November 2023 - Present (2 years 7 months)
Jakarta, Indonesia

- Smart Branch by Mandiri

Building platform for the largest public State-Owned Enterprise bank in Indonesia. Digitalizing bank branch operations nationally, accelerating and reducing fraud by 85%.

- KOPRA by Mandiri

Developing features for Indonesia's leading wholesale banking platform. To name as the Best Integrated Trade Finance Digital Platform and the Best Wholesale Platform for Transaction Banking, recording an annual transaction volume exceeding IDR 10,000 trillion.

- Cultural Network Team (CNT)

Taking part in cultural team for the IT Digital Channel Delivery Group to design programs that improve workplace morale, foster employee engagement and strengthen Bank Mandiri's organizational values.

Telkomsel

Frontend Developer

January 2023 - June 2023 (6 months)

Helping Telkomsel to develop a collaborative website that allows vendors to register or update data independently.

<https://verona.telkomsel.com/>

SuperApp (YC W18)

Frontend Web Developer

2021 - 2023 (2 years)

Assisting social commerce and hyper-local supply chain platform to digitize Indonesia's retail ecosystem. Owned the full front-end delivery cycle across multiple product lines, while pushing test coverage above 90% per feature.

Yummy Corp

Frontend Web Developer

July 2022 - December 2022 (6 months)

Kota Tangerang Selatan

Aiding ride-hailing drivers, end users, and kitchen staff to bridge cloud kitchens with point-of-sale systems, creating a seamless order flow. Building the interfaces that let users place orders which are instantly printed at the restaurant's POS for preparation. Resulting in faster turnaround, fewer order mistakes, and a smoother kitchen operation from screen to plate.

PT. Indolima Perkasa

Founding Frontend Web Developer

January 2022 - June 2022 (6 months)

Jakarta, Indonesia

As a single, founding front-end developer, I am responsible for building the company's core dashboard from the ground up. Shaping the architecture decisions and delivered a working product that operations teams relied on daily; to handle B2B sales operations, pipeline management, warehouse coordination, and logistics fleet tracking, all under one roof.

Hukumonline.com

Frontend Web Developer

July 2021 - December 2021 (6 months)

Jakarta, Indonesia

Taking a short project to help building Indonesia's reg-tech platform and legal news provider that democratizes access to the law.

<https://www.hukumonline.com/>

Tristan Artha Media

Frontend Web Developer

January 2021 - June 2021 (6 months)

Developing a responsive sport tournament platform, delivering a seamless experience across mobile and desktop for spectators.

Adactive Asia

Frontend Developer

January 2020 - December 2020 (1 year)

Singapore

Shipped 3D wayfinding solutions installed across major Singapore landmarks, including Singapore Discovery Centre, Supreme Courts, Woodsquare, and Republic Plaza. Helping thousands of visitors find their way inside complex facilities in real-time. Reduced the load on front desk staff and improved the visitor experience in high-traffic government and commercial buildings.

Yamisok Platform Indonesia

Frontend Web Developer

January 2018 - January 2020 (2 years 1 month)

Kota Tangerang Selatan

Building Indonesia's first integrated e-sports community and tournament platform designed to connect players with tournament organizers. Contributed to shaping Indonesia's competitive gaming scene at a time when organized e-sports infrastructure was still new. The platform gave grassroots players a real path to competitive play, and gave sponsors like Tokopedia, JD.ID, and Firstmedia a direct channel into the gaming community.

PT. Kawasan Industri Jababeka, Tbk

IT Technician Intern

January 2018 - April 2018 (4 months)

West Java, Indonesia

Starting my career as an IT/Network Support intern at Jababeka, one of Indonesia's largest industrial estate developers. Got hands-on experience keeping the tech running for a company that manages an entire industrial ecosystem

<https://www.jababeka.com/id/home/>

Brand Marketing Institute Consulting Group (BMICG)

Fullstack Web Developer

May 2017 - August 2017 (4 months)

South Jakarta

Took aging codebases and improved them, whether that meant cleaning up legacy PHP, restructuring database queries, or refreshing the front-end to match updated brand guidelines. One of the projects was for Bank Muamalat, one of Indonesia's established Islamic banking institutions.
