Viona Zatil Aqmar Kaleb

Software Engineer | MSIT | Cat Lover
Jakarta, Indonesia

Summary

Software Engineer with 8 years of building digital products at large scale. Architected a UK trading platform's Frontend from its first commit, with USD124M+ revenues and serving 1.2 million accounts globally. Deployed 3D wayfinding apps to serve thousands of visitors in high-traffic Singapore buildings. Currently digitizing the largest state-owned bank in Indonesia, live in 1,000+ branches with 30 million users, helping to cut fraud by 85%. Deep TypeScript, React and Angular Frontend expertise. With Express, PHP and Python on the Backend. 90% test coverage habits, plus a Master's in Computer Science focused on Machine Learning. Outside work: Building tools to help people, trail running, novels and patting street cats. Open to interesting conversations. If you're building something good, say hi. Portfolio: <https://viona-kaleb.vercel>

Experience

PT Bank Mandiri (Persero) Tbk.
Software Engineer
December 2023 - Present (2 years 7 months)
Jakarta, Indonesia

- Built features for Smart Branch by Mandiri, a digital banking platform live across 1,000+ branches with 30 million users nationwide, contributing to an 85% reduction in fraud incidents.
- Shipped wholesale banking features for KOPRA by Mandiri, the platform behind IDR 10,000+ trillion (USD 600B+) in annual transaction volume, as Indonesia's Best Integrated Trade Financial Platform.
- Delivered banking workflows that fulfilled strict security, compliance and audit standards in collaboration with product, backend and QA teams.
- Stack: Angular, Typescript, RxJs, NgRx

Self Employed

Freelance Software Engineer
May 2017 - Present (9 years 2 months)
Jakarta, Indonesia

Frontend Engineer

BMICG Jakarta | May-Aug 2017

Took aging codebases and improved them, refreshing the frontend to match updated brand guidelines. One of the projects was for Bank Muamalat, Indonesia's established Islamic banking institutions.

Skills: PHP, JQuery, CodeIgniter, MySQL

Frontend Engineer

Tristan Artha Media | Jan-Jun 2021

Developing a responsive sport tournament platform, delivering a seamless experience across mobile and desktop for spectators.

Skills: Next.js, Angular, GraphQL

Frontend Engineer

Hukumonline.com | Jul-Dec 2021

Taking a short project to help building Indonesia's reg-tech platform and legal news provider that democratizes access to the law.

Skills: Vue.js

Frontend Engineer

PT. Indolima Perkasa | Jan-Jun 2022

As a single, founding front-end developer, I am responsible for building the Igoana's core dashboard from the ground up. Shaping the architecture decisions and delivered a working product that operations teams relied on daily; to handle B2B sales operations, pipeline management, warehouse coordination, and logistics fleet tracking, all under one roof.

Skills: React.js and Firebase

Frontend Engineer

Yummy Corp | Jul-Dec 2022

Aiding ride-hailing drivers, end users, and kitchen staff to bridge cloud kitchens with point-of-sale systems, creating a seamless order flow. Building the interfaces that let users place orders which are instantly printed at the restaurant's POS for preparation. Resulting in faster turnaround, fewer order mistakes, and a smoother kitchen operation from screen to plate.

Skills: React.js and Firebase

Frontend Engineer

Telkomsel | Jan-Jun 2023

Helping Telkomsel to develop Verona, a collaborative website that allows vendors to register or update data independently.

Skills: Vue.js and Front-End Development

hypestacks

Frontend Engineer

January 2023 - December 2023 (1 year)

London Area, United Kingdom

- Architected and built the frontend stack from scratch for YourPropFirm, a B2B real-time trading analytics platform with USD124M+ revenues, serving 1.2M+ trading accounts and 65+ prop firm clients globally.
- Worked cross-functionally (frontend, backend, Power BI) with a distributed international team to turn complex trading concepts into performant real-time data visualization UI.
- Stack: Next.js, React, TypeScript, Zustand, Tanstack, Tailwind, MUI, Power BI, .NET

<https://hypestacks.com/>

SuperApp (YC W18)

Frontend Engineer

January 2021 - January 2023 (2 years 1 month)

- Owned full frontend delivery across multiple product lines for a social commerce and hyper-local supply chain platform serving Indonesia's retail ecosystem.
- Pushed test coverage to 90% using Jest and React Testing Library, cutting regression bugs in production.
- Shipped merchant onboarding, ordering and logistics features in partnership with product and design.
- Stack: React, Redux, ANTD, Styled Components, Storybook, Jest, React Testing Library, Micro Frontend

Adactive Asia

Frontend Engineer

January 2020 - December 2020 (1 year)

Singapore

- Deployed 3D wayfinding systems to major Singapore landmarks including the Supreme Court, Republic Plaza, Woods Square, serving thousands of visitors in high-traffic government and commercial buildings.
- Integrated 3D rendering with real-time location data alongside a multinational engineering team.
- Stack: React, JavaScript, Firebase, 3D rendering, real-time location APIs

Yamisok Platform Indonesia

Frontend Engineer

January 2018 - January 2020 (2 years 1 month)

Kota Tangerang Selatan

- Built Indonesia's first integrated e-sports community and tournament platform, connecting players with tournament organizers and sponsors. Supported partnerships with Tokopedia, JD.ID and Firstmedia.
- Shaped the early gaming scene in Indonesia by giving players clear path from casual to competitive play.
- Stack: Vue, Vuex, Foundation, BootstrapVue, PHP, Laravel, MySQL

PT. Kawasan Industri Jababeka, Tbk

IT Technician Intern

August 2017 - December 2017 (5 months)

West Java, Indonesia

- Starting career at one of Indonesia's largest industrial estate developers.
- Got hands-on experience keeping the tech running for a company that manages an entire industrial ecosystem.
