

VIONA Z. A. KALEB

SOFTWARE ENGINEER | MSIT

Jakarta, Indonesia | vionakaleb@gmail.com | www.linkedin.com/in/vionakaleb | viona-kaleb.vercel.app

SUMMARY

A Frontend-focused Software Engineer with 7+ years shipping production web apps across banking, fintech, e-commerce and logistics. A Master's in Computer Science. Currently helping to digitize operations across 1,000+ branches at Indonesia's largest state-owned bank. Previously built the frontend stack from scratch for a UK fintech now serving 1.2M+ trading accounts and 65+ prop firm clients. Earlier, shipped 3D wayfinding tools used daily across major Singapore landmarks. On the side, I build internal tools like an ATS Resume Generator and Timesheet Builder to make my teammates' lives easier.

EXPERIENCE

Frontend Engineer

Dec 2023 – Present

Bank Mandiri | Jakarta, Indonesia

- Built features for Smart Branch by Mandiri, a digital banking platform now live across 1,000+ branches nationwide, contributing to an 85% reduction in fraud incidents.
- Shipped wholesale banking features for KOPRA by Mandiri, the platform behind IDR 10,000+ trillion in annual transaction volume, recognized as Indonesia's Best Integrated Trade Finance Digital Platform.
- Collaborated with cross-functional teams (product, backend, QA) to deliver banking workflows that meet strict security and compliance standards.

Frontend Developer

Jan 2023 – Dec 2023

Hypestacks | London, United Kingdom

- Architected and built the frontend stack from scratch for a UK-based real-time trading analytics platform, now serving 1.2M+ trading accounts and 65+ prop firm clients globally.
- Partnered with an international team to translate trading concepts into intuitive, performant UI for real-time data visualization.

Frontend Web Developer

Jan 2021 – Jan 2023

SuperApp (YC W18) | Jakarta, Indonesia

- Owned full frontend delivery across multiple product lines for a social commerce and hyper-local supply chain platform serving Indonesia's retail ecosystem.
- Pushed test coverage above 90% per feature using Jest and React Testing Library, reducing regression bugs in production.
- Worked closely with product and design to ship features that supported merchant onboarding, ordering, and logistics flows.

Frontend Developer

Jan 2020 – Dec 2020

Adactive Asia | Singapore

- Deployed 3D wayfinding system across major Singapore landmarks including the Supreme Court and Wood Square, helping thousands of visitors navigate into high-traffic government & commercial buildings.
- Collaborated with an international team to integrate 3D rendering with real-time location data.

- Built Indonesia's first integrated e-sports community and tournament platform, connecting players with tournament organizers and sponsors. Supported partnerships with Tokopedia, JD.ID and Firstmedia.
- Shaping the gaming scene in Indonesia by giving players a clear path from casual to competitive play.
