# Viona Zatil Aqmar Kaleb

Software Engineer | MSIT | Building Scalable Fintech, E-commerce  
& Interactive 3D Solutions | React Angular Vue Typescript Node  
Jakarta, Indonesia

## Summary

Hi, I'm Viona. I've been writing code for 7 years. Mostly on the Frontend with React, Next, Angular, Vue. Though I'm comfortable across the backend stack too with Express, GraphQL, PHP, and Firebase. I also finished my Master's in Computer Science with a research in Machine Learning. Because while shipping features is fun, I like knowing why things work. And which is why I continuously eager to learn. What I love about this job is how different every project ends up being. A few years back I was building a 3D wayfinding system for some of Singapore's bigger landmarks: the Supreme Court, Republic Plaza, Wood Square, and the Singapore Discovery Centre. After that came real-time trading analytics for a UK fintech, running across 1.2 million trading accounts and over 65 prop firm clients globally. And these days I'm with the largest state-owned bank in Indonesia, helping cut branch-level errors and fraud by 85%. Along the way I've helped Indonesia by digitizing social commerce and hyperlocal supply chain platform with over 90% test coverage on every feature, connecting cloud kitchens to POS system to ease ride-hailing drivers taking their food orders, and building Indonesia's first integrated e-sports community and tournament platform designed to connect players with tournament organizers. I pick things up fast. New framework, unfamiliar domain, a legacy codebase nobody wants to open, I'll try to figure out within days. When I'm not coding, I go trail-running or reading books. Open to interesting conversations. If you're building something good, say hi. Website: <https://viona-kaleb.netlify.app>

## Yummy Corp

### Frontend Web Developer

July 2022 - December 2022 (6 months)

Kota Tangerang Selatan

Connecting cloud kitchens to POS Order Management System to help ride-hailing drivers taking their food orders, and help users to browse menus and place orders. Orders are instantly printed via the restaurant's POS system for processing. This system enhanced order accuracy, minimized wait times, and improved kitchen workflow.

<https://www.yummycorp.com/>

## PT. Indolima Perkasa

### Founding Frontend Web Developer

January 2022 - June 2022 (6 months)

Jakarta, Indonesia

Under project iGooana.

As the first Front End Developer, I initiated a dashboard for handling B2B Sales, Pipeline, Warehouse and Logistic Fleets.

<https://www2.indonesia5.com/>

<https://igooana.id/>

Hukumonline.com

Frontend Web Developer

July 2021 - December 2021 (6 months)

Jakarta, Indonesia

Short term project. Assigned to bugfix some features in HukumOnline.

<https://www.hukumonline.com/>

Tristan Artha Media

Frontend Web Developer

January 2021 - June 2021 (6 months)

Develop back-office & tournament platform in web and mobile responsive.

Create features, integrate API from BE. Translate designs from UI/UX.

<https://www.linkedin.com/in/tristan-artha-media-5a6286184>

Adactive Asia

Frontend Developer

January 2020 - December 2020 (1 year)

Singapore

Worked for a Singapore-based company to build OmniChannel 3D wayfinding apps installed in Singapore prominent buildings, such as Singapore Discovery Centre, Singapore Supreme Courts, Family Justice Courts, and Republic Plaza. These apps helped visitors navigate within the building using an interactive map.

Using ReactJS, Hooks, Canvas & Firebase.

- Create wayfinding apps for touchscreen display, installed in buildings.
- Create features & integrate from CMS. Translate designs from UI/UX.
- Develop apps for LG Smart TVs.

Developed projects:

- Singapore Discovery Centre

- Singapore Supreme Courts
- Singapore State Courts
- Family Justice Courts
- Woodsquare
- Republic Plaza

<https://www.adactive.asia/>

## Yamisok Platform Indonesia

### Frontend Web Developer

January 2018 - January 2020 (2 years 1 month)

Kota Tangerang Selatan

Building Indonesia's first integrated e-sports community and tournament platform designed to connect players with tournament organizers.

Using VueJS, Vuex, Bootstrap & Nuxt:

- Maintain and revamp websites.
- Develop single-page apps for project microsites.
- Integrate API from BE. Translate designs from UI/UX.

Developed projects:

- Yamisok Platform
- IESPL by Tokopedia
- IHSL by JD.ID
- Firstwarrior by Firstmedia

<https://yamisok.com>

## PT. Kawasan Industri Jababeka, Tbk
